NORTH EAST ENGLAND / COMMERCIAL CONTRACTOR

Ironwork, drainage & infrastructure remedials

Focused remedial support for residential developments and civil engineering contractors. Practical experience of drainage and chamber defects, ironwork adjustments and associated reinstatement, with affiliated groundworks capability.

Manhole frame and engineering brickwork in progress

Our services

01

Ironwork and gullies

Adjustment, raising and replacement of manhole frames and covers, road gullies and utility chamber ironwork.

02

Drainage remedials

Chamber repairs, drainage channels, benching and local alterations within agreed scope and competence.

03

Associated infrastructure

Cover slab works, local excavation, preparation and surface reinstatement to support defect close-out.

Commercial arrangements

Agreed schedules of rates, daywork or individually priced packages. Contact us with your defect list, quantities, drawings and programme requirements.

Our work in the field

Genuine site photography from our affiliated businesses, including work in progress.

Internal chamber and channel

Precast cover slab installation

Road gully and kerb interface

Chamber brickwork in progress

How we deliver

01 Assess the defect

Confirm asset condition, locations, specification and required repair.

02 Agree the method

Plan access, site controls, competence and resources for the agreed scope.

03 Deliver the repair

Coordinate with the client and associated trades; check against agreed requirements.

04 Record the works

Provide progress and completion evidence, identifying further actions.

Health, safety and quality

Task-specific risk assessments and method statements, operative competence and agreed site controls. Client-specific approval and accreditation requirements can be discussed during onboarding.
